

# CARE.DATA Programme

## Patient Objection Form

I wish to make an objection to prevent confidential information that identifies me to be shared outside of my GP practice through the CARE.DATA Programme, other than where there are exceptional circumstances or it is required by law.

You may tick *either* or *both* boxes:

**I wish to object to information containing data that identifies me from leaving my GP practice**  
*(This type of objection will prevent the identifiable information held in your GP record from being sent to the Health & Social Care Information Centre secure environment. It will also prevent those who have gained special legal approval from using your health information for research)*

**I wish to object to any information containing data that identifies me from leaving the Health & Social Care Information Centre secure environment (including information from all places you receive NHS care, such as hospitals)**  
*(This type of objection prevents confidential information from leaving HSCIC except in very rare circumstances, eg in the event of a civil emergency. If you do not object, information that identifies you will only leave HSCIC where there is special legal approval, eg for medical research)*

I have read the patient leaflet "How information about you helps us to provide better care" and the Frequently Asked Questions for patients. I understand that I can withdraw my objection at any time.
